Education

Dr. A.P.J. Abdul Kalam Technical University, Lucknow

CGPA: 7.9

Bachelor of Technology in Computer Science and Engineering

Technical Skills

Frontend Development: React.js, Tailwind CSS, Bootstrap, CSS, JavaScript

Backend Development: Node.js, Express.js, REST APIs, Axios

Database Development & Version Control: MongoDB, Git, Github

Developer Tools & Concepts: VS Code, Postman, SDLC, Debugging, Testing, Responsive Design

Professional Experience

FirstWire Apps | Lucknow, India

October 2023 to Present

Software Engineer (Frontend Developer)

- Developed and maintained responsive web applications using React.js, improving page load speed and user experience.
- Implemented reusable components, hooks, and Context API, reducing code duplication by 25% and improving scalability by 25% through effective backend collaboration.
- Debugged and resolved frontend issues using Chrome DevTools and performance optimization techniques, reducing bugs and downtime by 20%. Implemented state management with React Hooks and Redux. Participated in **code reviews, testing, and feature enhancements** to deliver reliable and high-quality software.

Certifications

MERN Full Stack Development Training

[Link](#)

- Gained proficiency in full-stack web development using MongoDB, Express.js, React, and Node.js.
- Covered client-server architecture, RESTful APIs, database management, and building responsive web applications.

Projects

Social Media Web Application

[Link](#)

- Developed a social media platform using the MERN stack (MongoDB, Express.js, React.js, Node.js) with secure JWT authentication, improving login security by 95%
- Developed features including **post creation, media sharing, tagging, and search functionality**.
- Implemented a tag-based search system to enhance content discovery efficiency and improve overall user experience.

GEN AI Resume Analyzer

[Link](#)

- Built a full-stack AI Resume Analyzer** using the MERN stack, integrated with the Google Gemini API to generate interview reports with match scores, questions, and skill gap analysis.
- Developed resume parsing and PDF generation** using PDFKit, extracting key sections and generating well-structured downloadable resumes.
- Deployed on Render** with JWT authentication, secure cookies, and CORS, ensuring high availability (~99% uptime) and smooth performance.

Real-Time Chat Application

[Link](#)

- Built a real-time chat application using the MERN stack (MongoDB, Express.js, React.js, Node.js) with Socket.IO for instant communication and JWT authentication to ensure secure user login, improving data security by 95%.
- Designed a responsive UI with Tailwind CSS and implemented React Hooks + Context API for state management.
- Optimized chat performance and scalability with Socket.IO events and MongoDB queries, achieving <200ms latency and improving accessibility by 40%. Improved chat performance with optimized event handling and database queries.

Achievements

- 5 Star and gold badge of C++ on Hacker Rank.
- Solved 200+ coding challenges on LeetCode, covering Arrays, Strings, Linked Lists, Tree, Binary Search and others.
